

Guide to securing international grant funding for Australasian life sciences research 2015

By Brent S. Ogilvie, Executive Director, Pacific Channel Limited

Pacific Channel's latest review of available grant resources "*Guide to securing international grant funding for Australasian life sciences research 2015*" profiles over 170 funding sources and 10 case studies analysing Australasian success stories.

The report provides a detailed review of international funding available for Australia and New Zealand life sciences research.

For each grant source the *Guide to securing international grant funding for Australasian life sciences research 2015* provides:

- Comprehensive background information on each fund including contact details
- The value and size of the fund
- Criteria for grant applications
- Information to assist with applications

Profiles of each grant entity are coded to clarify the research and development financed by each fund for example:

- Fundamental research e.g. molecular basis of juvenile diabetics
- Clinical trial research
- Research and technology in the farming or environmental science sector
- Education, health and well-being programmes

The guide is now a dynamic publication that is updated as new information becomes available ensuring the guide is current, regardless of when you place your order. Alternatively – for AU\$149 plus GST – you can subscribe to 12 months direct access to a searchable database for the Guide, eGuide (eguide.pacificchannel.com).

Pacific Channel is New Zealand's leading venture creation, development and investment firm focused on start-up and early-stage life-science and clean-tech innovation. It provides extensive case studies on Australian and New Zealand companies as well as institutions that have demonstrated success in receiving EU, US and Japan grant capital from these grant resources.

About the Authors:

Brent S. Ogilvie, a former New Zealand Consul and Trade Commissioner to New York (specialising in life sciences), is managing director of Pacific Channel. As part of Pacific Channel's seed investments Brent Ogilvie is also CEO (part-time) and director of several material technology and biotechnology start-ups in human health as well as agbiotech. He holds a BSc. (Bio.) from The University of Waikato and a Master of Business Administration (MBA) from the University of Auckland. His MBA thesis investigated the key differences between drivers of venture capital investment and philanthropic grant into biomedical ventures.

Pacific Channel facilitates the growth of commercially viable life sciences and clean-tech companies in Australasia through its access to expertise and financial capital. Pacific Channel was formed as a "channel" between Australasia and the world's largest market - the United States, acting as a conduit toward long-term, global growth and success.

Endorsements:

"Living Cell Technologies has secured significant grant funding with Pacific Channel's assistance. Its grant report demonstrates the array of US grant funding opportunities available to Australian and New Zealand companies." **Dr Paul Tan, Former CEO, Living Cell Technologies Pty Ltd**

"The best analysis I have seen of US grant funding sources potentially available to Australian biotechnology" **Dr Helen Karuso, Washington DC Austrade**
